Prana BCI system 300 - 600 mA:

Tests with only 1 amplifier and 1 bulk:
- Broadband (instantaneous single band): 10 kHz – 400 MHz
- Composed of:
  - 1 Prana amplifier: DR 220
  - 1 Prana Bulk current Injection: IP-DR250 with calibration JIG CJ-DR250
- Typical current injection: 300 – 600 mA
- Reliable, efficient and robust
- 3 years standard warranty

EMC standards covered:
- DO 160 D
- Mil STD 461
- Automotive Standards : PSA, Renault, Ford, Daimler Chrysler...
- ISO 11452-4
- SAE J1113-4
- ...

Other BCI systems:
- BCI system with DR 400 => 600 mA – 1000 mA
- BCI system with DT 150 => 300 mA – 600 mA

Prana additional options:
- External coupler
- Supply and integration inside a cabinet
- RF Power cable
- Switching unit
- Attenuator / load

Maintenance:
- Amplifier designed for minimal maintenance
  - Easy access to all parts
  - Modular design
  - Repairs with minimum adjustments
- Rapid diagnostic
- Minimal downtime
- Contract for preventive and corrective maintenance available

Prana DR 220 power amplifier

Prana IP-DR250 clamp + CJ-DR250 JIG
System BCI configuration

Power meter → 40dB Atten → IP-DR250 Injection clamp → CJ-DR250 calibration jig → 50Ω Load

DR 220
POWER AMPLIFIER
0.01–400MHz

Power graph

Bulk Current Injection Probe with DR 220 Amplifier

- Induced current at 1dB compression
- Induced current at 3dB compression
